SUMMARY

Software Engineer with hands-on experience building scalable fintech systems using Java, Spring Boot, AngularJS, and SQL. Strong foundation in Data Structures and Algorithms with 710+ LeetCode problems solved. Experienced in secure API development, data validation, and performance optimization for high-throughput transaction systems.

EXPERIENCE

Software Engineer, Digiotech Solutions Pvt. Ltd. (May 2025 – Present)

• Built RESTful APIs using Java and Spring Boot for mandate creation and cancellation handling 50k+ monthly transactions.
• Implemented validation, idempotency, and secure workflows aligned with financial transaction requirements.
• Automated sponsor bank onboarding workflows, reducing manual effort by 40%.
• Optimized SQL queries and endpoints, reducing average API latency by 30%.
• Integrated AngularJS dashboards for internal operations teams.

Software Development Engineer Intern, Digiotech Solutions Pvt. Ltd. (June 2024 – Apr 2025)

• Developed secure bank integration modules supporting real-time mandate processing.
• Implemented validation and error-handling pipelines, reducing transaction failures by 20%.
• Participated in Agile sprints, code reviews, and wrote unit-tested backend components.

PROJECTS

Scalable URL Shortener (Java, Spring Boot, Redis, MySQL, Docker)

• Designed REST APIs for URL creation, redirection, and analytics with input validation and rate limiting.
• Implemented Redis caching to reduce database reads by 60%.
• Added basic authentication, health checks, and containerized deployment using Docker.

Distributed Task Queue System (Java)

• Built producer-consumer workers to process background jobs with retries and idempotency.
• Added job status and worker health endpoints for monitoring and reliability.

Style Sprint – E-commerce Platform (React, Node.js, MongoDB)

• Implemented product listing, cart, checkout, and JWT-based authentication.
• Designed REST APIs and improved response times by 25% via pagination and indexing.
• Added role-based access control and order history.

Realtime Collaborative Code Editor (React, WebSockets)

• Implemented real-time multi-user rooms with WebSockets and concurrency control.
• Built accessible UI and basic code execution sandbox.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript
Frameworks: Spring Boot, AngularJS, React
Databases: MySQL, MongoDB
Core CS: Data Structures, Algorithms, OOP, REST APIs, Concurrency Basics
Tools: Git, GitHub, Postman, Docker

EDUCATION

B.Tech in Computer Science and Engineering, Lovely Professional University (2021 – 2025) | CGPA: 9.23/10

ACHIEVEMENTS

• Winner, HacknCrack Hackathon (2022)
• Core Member, Google Developer Student Club (2023 – Present)

- Certifications: Google Cloud Study Jam, IBM Full Stack Web Development, Google UX Design
